

COMPRESSION SOFA – USER GUIDE & CARE INSTRUCTIONS

Unpacking Instructions

1. Prepare the Area

- Place the package on a clean, flat surface, away from sharp objects.

2. Open the Package Carefully

- Tear open the plastic bag from the corner or edge - do not use knives or scissors to avoid fabric damage.
- *Warning: Sharp tools may puncture the sofa or cause injury.*

3. Remove the Sofa & Allow Expansion

- Once unsealed, the sofa will begin expanding:
 - 80% recovery within 2 hours.
 - Full shape restored within 72 hours (creases will smooth out).
- *To accelerate rebound, gently pat the surface and adjust the inner filling.*

4. Unpack Promptly

- Open immediately after delivery. Prolonged compression may affect shape recovery.

Important Notes

1. Fabric Creases

- Creases are normal due to vacuum packaging and not a defect.
- To speed up removal, lightly steam with a garment steamer using a cloth barrier, or pat gently by hand.

2. Moisture & Ventilation

- Keep the base dry and ensure proper ventilation.
- In humid climates, periodically lift and rotate the sofa to avoid moisture buildup.
- If mould appears, clean the area with a 1:1 mixture of water and white vinegar, and dry thoroughly.

3. Velvet/Corduroy Fabrics

- Slight colour variation may occur due to pile direction – this is normal.
- Smooth fibres in one direction by hand to even out the appearance.

Fabric Care Instructions

Cleaning Code: *SOLVENT OR WATER CLEANABLE (S/W)*

For Removable Covers:

- Hand wash only in cold water with mild detergent.
- Gently agitate without twisting or wringing.
- Rinse thoroughly and hang to dry. Do not tumble dry.

Spot Cleaning (Recommended):

We recommend using:

- Upholstery shampoo
- Foam from a mild detergent
- Mild cleaning solvent

Important Notes:

- Prioritize spot cleaning for daily maintenance.
- Always hang to dry after cleaning.
- Blot spills immediately – do not rub.
- Clean stains from the outside toward the centre to avoid ring marks.
- Test cleaning products on a hidden area first.
